

PRODUCT INFORMATION

Vesele® is a dietary supplement composed of synergistic amino acids designed to maximize the benefits of Nitric Oxide (NO) to support men's and women's sexual health. At the correct dosing levels, these nutrients have a well-recognized benefit in boosting blood flow throughout the body.†

SUGGESTED USE

- Take four (4) capsules daily with meals or as instructed by a healthcare professional.
- Two (2) capsules in the morning and two (2) capsules in the afternoon (4-6 hours prior to bedtime) daily for a minimum of four months. Not recommended to exceed more than six (6) capsules per day.
- A minimum of 4 months of daily intake is needed for the L-Arginine to reach high enough levels to affect nitric oxide concentration and result in the benefit observed with the participants in the study.

DOSAGE

Each serving contains 1500 mg of Vesele® proprietary blend.

WARNINGS AND PRECAUTIONS

Consult a physician before using if pregnant, nursing or on medication.

A potential side effect of Vesele® is dry mouth. It is recommended to drink 62 oz. of fluids daily when taking Vesele®.

Arginine may interact with certain medications that lower blood pressure. It may also interact with certain heart medications. Please talk to your doctor before taking Vesele® if you have low blood pressure or are on heart medication.

DESCRIPTION

Vesele® is a proprietary blend of the following ingredients

L-Citrulline

L-Arginine

BioPerine® (piperine extract)

Additional ingredients are microcrystalline cellulose, silicon dioxide and magnesium stearate.

The body converts L-Arginine to Nitric Oxide (NO), which is necessary to maintain functions to protect endothelial cells that line the entire circulatory system, relax blood vessels, boost the immune system and enhance memory by providing better blood flow and better nerve signaling throughout the body.

When the body converts L-Arginine to Nitric Oxide (NO), a natural by-product of that conversion is L-Citrulline. The resulting L-Citrulline combines with the L-Citrulline found in Vesele® to produce more L-Arginine, which the body then converts to more NO.

Blood flow is increased to:

- the brain to support sexual attraction, arousal and memory recall.

- the penis to support a firm and lasting erection.
- female sexual organs to support and promote vaginal lubrication, sensitivity and pleasure.

BioPerine® is an effective bioavailability enhancer to increase the absorption of both L-Arginine and L-Citrulline. Increased absorption promotes longer and greater use in the body than with normal digestion and absorption.

ADVERSE REACTIONS

The most commonly reported adverse reaction when using Vesele® were dry mouth and sleep disturbance if the second dose was taken late day.

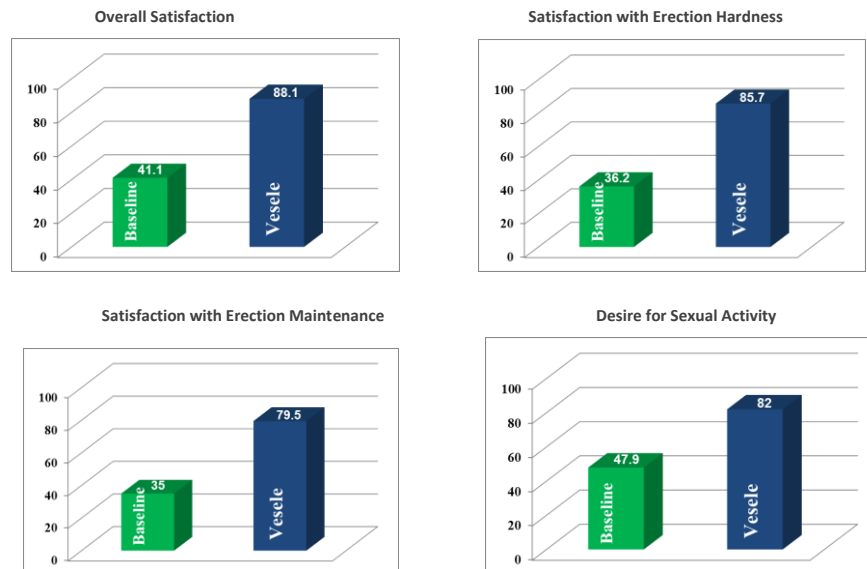

In clinical trials of arginine, possible side effects include abdominal pain and bloating, diarrhea, and mouth dryness.

USE IN SPECIFIC POPULATIONS

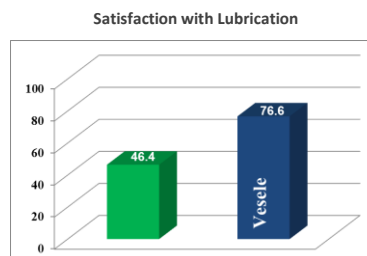

Pregnancy: Vesele® has not been studied for effect during use while pregnant. As with any dietary supplement, consult a physician before using if pregnant, nursing or on medication. ⁺

CLINICAL EXPERIENCE

Vesele® was evaluated in a clinical use survey, 72 subjects (45% men, 55% women) used Vesele® for up to 4 months. Over 70% were ≥40 years of age. A five-point satisfaction scale was used to measure sexual endpoints and memory recall. Compared to baseline, the majority of men (88%) were satisfied with their overall sexual health and reported a 49.5% increase in erection hardness, a 44.5% increase in erection maintenance, a 34.6% increase in desire for sexual activity and a 44% increase in overall satisfaction at the end of the user survey.

Women (76.5%) reported an increase in satisfaction for lubrication.

Both men (81.1%) and women (65.8%) reported satisfaction with memory recall. ⁺

HOW SUPPLIED/STORAGE AND HANDLING

Vesele® is supplied as an oval capsule, available in bottles containing 120 capsules.

Store in a cool dry place at room temperature.

Vesele® is not a drug and is not indicated for erectile dysfunction or any other medical condition or disorder. It is not a replacement for drugs prescribed for erectile dysfunction.
